

DT-1616

- RGB LED-panel with 16 x RGB LED's (48 LED's)
- Practical LED-life of 50.000 hours
- Power consumption only 6 Watt / panel (all colours at full brightness)
- Beam angle of 120°
- Easy interconnection between modules with flat cables or screw terminal
- For smooth colour and brightness control TDE produces a wide range of LED-drivers and controllers. All drivers can supply up to 320 Watts of output power, deliverable in 3, 4, 6 and 48 channels

Single module specifications:

LED's:	48 LEDs (16 x RGB-LED)
Power supply:	24 VDC
Current:	240 mA total (± 80 mA / colour)
Consumption:	6 Watt / module
Dimensions:	150 x 150 x 4 mm
